## Letter of interest and support

L.S.,

I hereby would like to express my strong support for the VIDI proposal of dr. Alexandru Iosup. I think the proposal addresses an urgent and scientifically challenging problem in modern Computer Science. It promises to make major steps to enable complex data services at a much broader scale than possible today. Dr. Iosup is ideally suited to take up this challenge. He of course has deep knowledge in this area, but he also has exactly the right network both in academia and industry to have success. Finally, he is extremely well motivated and he has a rare gift to clearly convey his ideas and visions to others, from students to the general public. I would be more than happy to participate in this project and to become a member of the MagnaData User Advisory Board.

Kind regards,

Prof.dr.ir. H.E. Bal
